PROJECT

Card Duel — Turn-Based Card Battle Prototype (Solo)

Tech: Unity 6.2, C#

- Designed a solo turn-based card duel prototype featuring a complete action-resolution gameplay loop, covering card selection, turn execution, and outcome feedback
- Implemented random events and adjusted numerical values to balance pacing, increase strategic variety between runs, and reduce the impact of dominant or repetitive strategies

GameNightYeah – Game Night Planning Website

Tech: HTML, CSS, JavaScript

<https://github.com/wangcb424/GameNightYeah>

- Developed a multi-page game night planning website for organizing game nights, including structured navigation, page-to-page flow, and interactive UI elements built with JavaScript
- Focused on front end usability and layout consistency to support planning tasks such as browsing options, viewing details, and coordinating events through intuitive interactions

EXPERIENCE
